**Landmine/ERW Training**

**66 UN Personnel**

*PST deminer during reaccreditation of the PST in Abyei*

*UNMAS Casspir vehicle coming to the rescue of a UN ambulance*

The UNMAS Integrated Road Assessment and Clearance Teams (IRACT) remobilized by the end of September, after the rainy season stand down period.

With its four PSTs, UNMAS is dedicated to supporting all the Ground Monitoring Missions (GMMs) in the SDBZ. During September, the reaccreditation process of the PSTs commenced, which will ensure licenced operations for another year.

One PST from the JBVMM Sector 1 remained in Abyei to respond to any emergency Explosive Ordnance Disposal (EOD) requirements in absence of demobilized IRACTs. The remaining PST from the Sector 1 was operational and on standby for GMM.

JBVMM Sector 2 continued to undertake GMMs with two UNMAS PSTs, which are rotating on a bi-weekly basis. In September, 7 GMMs were conducted from the Tishwin team site.

South Sudan's President Salva Kiir signed a final peace deal with main rebel leader Riek Machar on 12 September, formally ending a five-year war. The deal was mediated by Sudan and signed in Addis Ababa, Ethiopia.

The Abyei community organized a peaceful demonstration in front of the UNISFA camp on 20 September. The purpose of the demonstration was to show support for UNISFA in light of the Security Council discussion of the Letter dated 20 August 2018 from the Secretary-General addressed to the President of the Security Council (S/2018/778).

The Joint Political and Security Mechanism (JPSM) of Sudan and South Sudan extraordinary meeting called by the African Union High Level Implementation Panel (AUHIP) was held in Addis Ababa on 24 September. The outcome document addressed the 6 benchmarks of SC Resolutions 2412 and 2386.

Based on the JPSM outcome document, the Government of South Sudan will establish a team tasked to sensitize communities to enable UNISFA ground movement from Gok Machar to SDBZ and the re-establishment of Team Sites (TS) Safahah/Kiir Adem and As Sumayah/Wierayen in JBVMM Sector 1. In JBVMM Sector 2, the Abu Qussa/Wunkur TS must be established in October. Together with the currently operational Tishwin TS, the aforementioned team sites would address the SC's requirement of 4 team sites.

The two governments agreed to redeploy forces out of the SDBZ in 4 locations by mid-November and confirmed that all 10 border crossings are open and safe, for which each country will establish custom and migration offices. Two additional border crossings were identified, Kosti-Renk-Nile crossing and Talodi-Tonja. The opening of the Timsahah-Buram corridor should be facilitated by UNISFA.
